Car Park Access

Access to the basement car park is by security cardkey on both the entry and exit routes. The entrances are monitored by closed circuit television (CCTV). Authorised staff have cardkeys programmed by Security to allow access to the car park. Attempting to tailgate risks damaging cars.

The car park is open from 0730 to 2100 Monday to Saturday. The car park is normally closed on Sundays and Bank Holidays unless Security is advised at least 2 working days in advance

that access is required. Staff called out to deal with an emergency outside normal working hours must report to Security at Reception first. Access to the building from the car park is only by exiting the building from the lobby and re-entering via the main entrance. There is no direct entry into the building from car park level.

Car Park Allocation

Car parking is strictly controlled. Permanent spaces for authorised staff are allocated by specific business areas in accordance with Abbey's Car Parking Policy. The allocation excludes disabled space which will be distributed to users as required in addition to their allocated quotas. However, once exhausted, user areas are expected to accommodate additional disabled spaces from their allocation. One basement space is allocated for Property use in managing the buildings facilities services. Staff entitled to a space should make sure that vehicles are made secure when parked in the basement. Vehicles are parked at the owners' risk.
